MEMORANDUM FOR: Executive Director-Comptroller
SUBJECT : Future Needs for Telecommunications
REFERENCE : Memorandum from Ex. Dir.-Compt, dtd
24 Jan 68, Same Subject

1. Attached are new requirements for telecommunications for the Directorate of Support for the period FY 1969 - 1974.
2. The requirements are summarized for each office, except for the Support Information Processing System (SIPS) which is an integrated program for the Support Directorate. Detailed information concerning these requirements will be made available if desired.
3. It is suggested that the submissions from other Directorates be forwarded to the Office of Communications so that it may use this information in planning.

SIGNED R. L. Bannerman

R. L. Bannerman
Deputy Director
for Support

SUPPORT INFORMATION PROCESSING SYSTEM

1. The Support Information Processing System is a program for automating certain functions of the Support Directorate using the facilities of the Office of Computer Services. Remote input/output devices will be required in the Headquarters Building, at other locations in the Washington area, [REDACTED]

25X1 [REDACTED] Many overseas stations ultimately will be included in this project, but for this planning period they will use the existing teletype network, with the one exception [REDACTED] which may require a higher quality link.

2. The following data circuits will be required between Office of Computer Services, Langley, and the following listed locations:

a. FY 69: Ames Building	3
[REDACTED]	2
	2
South Building	1
[REDACTED]	1
	1
b. FY 70: Key Building	1
[REDACTED]	1
	1
c. FY 71: Magazine Building	1
1000 Glebe	1

3. In addition, a number of remote inputs/outputs will be required for the Office of Computer Services in the Headquarters Building:

FY 69 - 2
FY 70 - 1
FY 71 - 1
FY 72 - 4
FY 73 - None
FY 74 - 2

4. There is a potential need for inputs/outputs to an additional 30 sources in Langley, but these are not firm requirements, and many of the users probably can share a terminal device.

SECRET

OFFICE OF SECURITY

Following are listed the additional communications services required by the Office of Security:

1. Secure Voice

- a. Call Director with one Telecopier in the Building.
- b. KY-3 line with one Telecopier for Physical Security Division component (location uncertain).
- c. When possible interface KY-3 lines with the NSA Gray system.

d.

e.

2. Data Links

a. Langley

Six circuits connecting Office of Security components with Office of Computer Services.

- b. Several data circuits in the Washington area may be required depending upon the success of the prototype now being installed between Langley and

OFFICE OF LOGISTICS

The many components of the Office of Logistics are widely scattered and need rapid, secure communications. The following is required:

1. Secure Voice Circuits

a. Washington Area (KY-3)

Langley	8
Ames	3

~~SECRET~~

b. Long Distance (HY-2)

25X1

2. Secure Facsimile

Department of Army
Department of Navy
Department of Air Force
Department of State
General Services Administration

25X1

Ames Building
Langley (2 locations)

3. Radiophone service is required for the couriers in the Washington area. It is desired to eventually convert this to a secure voice system.

OFFICE OF PERSONNEL

Following is a list of secure voice and facsimile services required for the Office of Personnel.

1. There is an immediate need for one KY-3 in Langley and two KY-3 lines in Magazine Building. Each KY-3 should be equipped with a Call Director, and two should be provided with Xerox Telecopiers. Part of this equipment will be installed in FY 1968, and the remainder in early FY 1969.

Additional Requirements FY 1969 - 1974:

2 KY-3 Lines with Call Director and Telecopiers - Magazine Building.

1 KY-3 Line with Telecopier - Ames Building.

2. There is a need for a secure telephone system among the OP components in the Magazine Building.

3. A secure telephone/facsimile circuit is needed between Headquarters and the Records Center

~~SECRET~~

4. Chief, Benefits & Services Division requires secure voice to:

- a. Director, Bureau of Employment Compensation
- b. Director, Bureau of Retirement Insurance
- c. Chief, Mortuary Branch, Quartermaster Corps

5. The Chief, Recruitment Division needs secure voice and facsimile communications between his office in Rosslyn and [] field recruitment offices located throughout the United States. He would also have use for closed-circuit television to each of these field offices if this service becomes available.

OFFICE OF FINANCE

1. Because of its location in two buildings in the Rosslyn area the Office of Finance requires additional secure voice lines for inter and intra office communications. The office has 2 KY-3 lines, but only one is equipped with a Call Director. There is an immediate requirement for 3 more KY-3 circuits and 4 Call Directors.

2. At times there is a requirement for secure voice communication between the Office of Finance and the CIA Stations in []. This requirement does not justify major expenditures for equipment or circuitry, but this office would have use for this service if it becomes available.

OFFICE OF MEDICAL SERVICES

The Office of Medical Services could provide better support to overseas stations if secure voice and secure facsimile facilities could be made available. These electrical communications services would be particularly valuable during emergencies. There are no requirements which justify separate, costly facilities.

~~SECRET~~

25X1

OFFICE OF COMMUNICATIONS

The Office of Communications does not require separate electrical communications service.
